

JAML Token - Whitepaper

Introduction

JAML is a decentralized cryptocurrency inspired by the strength, endurance, and symbolism of the camel.

Built on Ethereum ERC-20, it represents long-term value, resilience, and community.

Vision and Mission

Our mission is to build a sustainable, community-driven token that thrives in the ever-changing landscape of the crypto world, just like the camel thrives in the harsh desert.

Why the Camel?

The camel represents endurance, patience, and strength - key qualities we believe every long-term project should embrace.

Token Details

Name: JAML

Symbol: JAML

Network: Ethereum (ERC-20)

Total Supply: 1,000,000,000 JAML

Roadmap

Q1: Token creation and launch

Q2: Website and community building

Q3: Listings on decentralized exchanges

Q4: CMC/CG applications and partnerships

JAML Token - Whitepaper

Technology

JAML is an ERC-20 token ensuring security, transparency, and compatibility with Ethereum-based tools and wallets.

Security

Smart contract audited. Liquidity will be locked. No minting function.

Community will control governance decisions over time.

Distribution

Initial distribution will be transparent and community-based with a focus on fairness and growth.

Community
